Total				16,739	5,130				

This inventory includes developments that are approved, under construction or completed. It includes both 100% affordable developments as well as "inclusionary" developments that set-aside a portion of the total units as affordable. The term "affordable" is as defined by the Council on Affordable Housing and the N.J. Fair Housing Act and involves deed restricting units so that they are affordable to low and moderate (L&M) income households. Affordable housing developments comprised of fewer than four units, serve people with special needs, accessory apartments, and rehabilitated units are not included in order to protect the privacy of individuals. Developments that have been proposed but not approved are not included.

The classification of developments as rental, sale, age-restricted and non age-restricted applies solely to the affordable units, not the market rate units. Some developments include a mixture of age-restricted and non-age restricted affordable units.
