* Ranked out of all municipalities in New Jersey

SOURCE: U.S. Census Bureau, 2007 - 2011 and 2012 - 2016 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error, which may be relatively large for smaller geographies and population sub-groups. In addition to sampling variability, the ACS estimates are subject to nonsampling error.

For information on ACS methodology, see: <http://www.census.gov/programs-surveys/acs/methodology.html>
