SOURCE: U.S. Census Bureau, 2009 - 2013 and 2014 - 2018 American Community Survey

For the 2009 - 2013 ACS, values greater than \$1 million were reported as \$1,000,000+

Dash "-" means unable to calculate.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error, which may be relatively large for smaller geographies and population sub-groups. In addition to sampling variability, the ACS estimates are subject to nonsampling error.
